LATO SALDATURA PCB 05-190-3

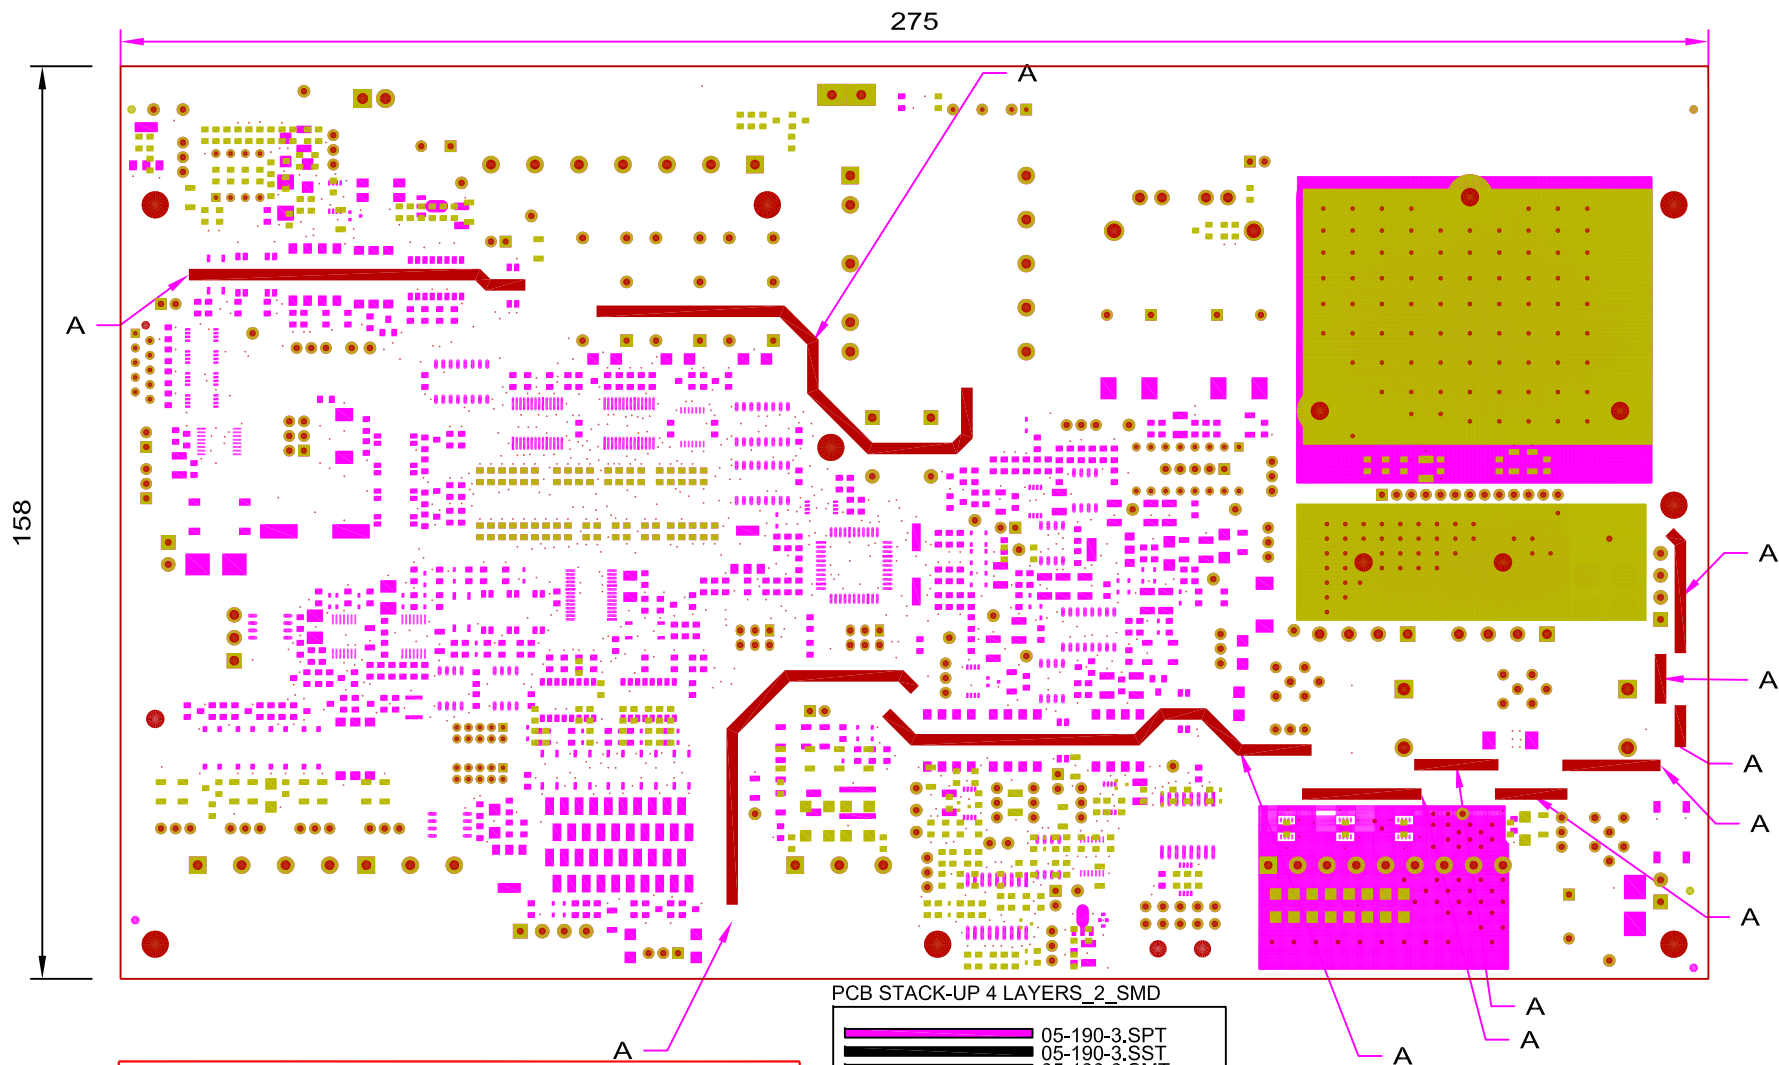

NOTA1:

- Interporre tra modulo PCB1 e dissipatore MQ11194-00 Thermal Gap Denka tipo FSL400B 35 X 60 mm.
- Allocare l'assieme descritto al punto "a" sul pcb inserendo la strip nella sede indicata senza saldare il componente.
- Bloccare l'assieme precedente al punto "a" con viti VTSTC M3 X 16 INOX + rondella elastica + dado M3 INOX.
- Eseguire la saldatura dei terminali della strip.

NOTA2:

- Piegare a 90° i terminali di PD1 e PD2, evitando fratture e stress meccanici ai componenti.
- Saldare PD1 e PD2 lasciando una distanza parallela tra loro e il pcb di 1 mm min.
- Interporre tra PD1, PD2 e pcb Thermal Pad DENKA FSL100B spessore 1mm
- Bloccare PD1 e PD2 con viti VTCEI M3 X 10 INOX + rondella piana + rosetta elastica + dado M3 INOX
